

SRUTHI GANDLA

Boston, MA | (857)-445-9646 | gandla.s@northeastern.edu | [LinkedIn](#) | [GitHub](#)

EDUCATION

Northeastern University, Boston MA

Master of Science in Data Analytics and Engineering

Expected Dec 2025

GPA: 3.94/4

Relevant Coursework: Foundation of Data Analytics, Data Management, Computation Visualization, Data Mining

Vellore Institute of Technology, India

Bachelors in Electronics and Communication Engineering

May 2023

GPA: 3.52/4

SKILLS

Programming Languages: Python, Java, MATLAB, R, SQL (PostgreSQL and MySQL)

Data Visualization Tools: Tableau, Power BI, Jupyter Notebook, Google Analytics, Looker

Big Data Tools: Big Query, SQL, Airflow, Docker, Kubernetes

ERP & Reporting Tools: JDE, Cognos, Microsoft Dynamics 365, Smartsheet

Software & Productivity: MS Excel (Pivot Tables, VLOOKUP, KPI Dashboards), MS Word, PowerPoint, Google Suite, Git

Machine Learning Skills: Regression, Classification, Time Series Analysis, Hypothesis Testing, Clustering, Neural Networks

Soft Skills: Strong written and Verbal Communication, Problem solving, Analytical Skills, Team Collaboration

WORK EXPERIENCE

Berry Global Inc, Bristol, Rhode Island, MA

June 2024 – Dec 2024

Product Data Analyst Intern

- Collected and analyzed operational data from sales, supply chain, and production pipelines, delivering insights that improved process efficiency across HVAC, Retail, and Automotive sectors.
- Led advanced data analysis initiatives using Python, Tableau, and Power BI, uncovering customer buying patterns and shipping trends to optimize business strategies.
- Developed predictive models, including multivariate regression and ARIMA, achieving 75%+ accuracy in trend forecasting to guide strategic decision-making and support inventory planning.
- Streamlined sales reporting processes by automating SQL-based dashboards, reducing reporting time by 30%.

Siyaton Software Solutions Pvt Ltd, Hyderabad, India

Apr 2023 - Aug 2023

Data Analyst

- Led teams in formulating market strategies for Fortune 500 Companies, resulting in an 8% market share increase.
- Employed SQL methodologies to extract and analyze diverse data sets, enhancing the depth of market research insights.
- Created Tableau dashboards for in-depth analysis of different key performance indicators (KPIs) in digital advertising.
- Catalyzed a 20% improvement in client product usage through Python-driven time series forecasting analysis.
- Engaged in collaborative efforts with cross-functional teams within an Agile environment to provide valuable insights for business stakeholders.

PROJECTS

Steam Game Recommendation System | Python, Flask, Scikit-learn, GCP, MLflow, GitHub Actions

Spring 2025

- Built a hybrid recommender system (collaborative (KNN) + content-based) with 85% precision@5 on Steam user data.
- Developed a Flask-based web UI, containerized with Docker, and deployed on GCP Kubernetes Engine for scalable access.
- Automated end-to-end model training and deployment via CI/CD pipelines using GitHub Actions, reducing release time by 40%.
- Logged real-time inference data to Big Query and visualized data drift and performance metrics using Google Cloud Monitoring and Looker dashboards.

SpaceX Falcon 9 Landing Prediction | Python, Seaborn, HTML

Spring 2024

- Collected, cleaned and preprocessed the SpaceX data to ensure quality and consistency in predicting its first stage landing success through data-driven machine learning.
- Performed exploratory data analysis to gain insights and identify patterns, engineered features and trained machine learning models (SVM, Classification trees, Logistic Regression) achieving an 80% accuracy in the landing success.
- Developed an interactive Dash application using HTML and Python, enhancing user engagement by 60%.

Customer Segmentation | Python, Scikit-learn, Matplotlib

Fall 2023

- Implemented RFM analysis on ecommerce data improving targeted marketing and retention by 20%.
- Used Python programming for data preprocessing, RFM score computation, and K-means clustering to group customers based on their behavior patterns, facilitating more precise targeting.
- Achieved a 15% enhancement in business decision-making through customer segmentation.

Market Basket Analysis | MLX tend, Association rule mining, Python, Tableau

Summer 2023

- Applied the Apriori Algorithm to supermarket transaction data extracting patterns and associations among purchased items, reducing processing time by 30% with MLX tend.
- Utilized Tableau for advanced data visualization, enhancing insights into transaction patterns and item associations.
- Extracted strategic insights, contributing to a 25% improvement in decision-making.
